

REPORT OF THE BUDGET BOARD STATE OF SOUTH DAKOTA

For the Fiscal Years 1923-24 and 1924-25

**TO THE EIGHTEENTH SESSION OF THE
SOUTH DAKOTA LEGISLATURE**

BUDGET BOARD

W. H. McMASTER, Governor, Pierre, S. D., Chairman.
E. W. ERICSON, Alcester, S. D., Chairman Pro Tern. HUGH
SMITH, Pierre, S. D., Chairman Tax Commission. C. D.
ERSKINE, Sturgis, S. D., Member Senate.
E. O. FRESCOLN, Winner, S. D., Speaker, House of Representatives.
JOHN STENNING, Raymond, S. D., Member, House of Representatives. E.
A. JONES, Canton, S. D., State Auditor, Secretary.

TRANSMITTAL

Pierre, South Dakota,
January 17, 1923.

To the Honorable Members of the Legislature of the State of South Dakota, Assembled in the Eighteenth Biennial Session.

Gentlemen

Pursuant to the provisions of Section 5103-5108 of the Revised Code of South Dakota for the year 1919, and Acts Amendatory thereof, we, the members of the Budget Board, have the honor to transmit to your Honorable Body, for your careful perusal and just consideration, the estimates of said Board covering the amounts required to be appropriated by the Legislature for conducting the business of the State of South Dakota, during the two fiscal years next ensuing, being the fiscal years ending June 30, 1924, and June 30, 1925, respectively, and in addition thereto the emergency and deficiency appropriations the Board found necessary.

GENERAL REVIEW

The Board adhered to the general policy of keeping its estimates as conservative as possible, consistent with the needs of a great and growing commonwealth. In the investigations carried on certain facts were brought out in connection with all the charitable, penal and educational institutions of the State. One fact in particular was that for quite some time the building program, so strongly urged by the preceding Budget Board, for the State had been sadly neglected. This situation, of course, created a most deplorable condition in the institutions maintained for the care of the State's unfortunates. The unit of society represented by the State of South Dakota, in keeping with its high standards, must look well toward the support and care of those who by virtue of circumstances have a special claim upon her citizenship. One of the most striking effects of building postponement was found at the penitentiary, located at Sioux Falls. The population at this institution increased 41 (41) over the population for the year 1921. The best authorities consulted on criminal housing agreed that the penitentiary was not only unsanitary, but unsafe and inadequate. Space does not permit going at length into the conditions at this institution. A clearer idea of the situation could be obtained by consulting those having supervision of the penitentiary. The Board would stress this point, that the theory of punishment is to correct the criminal tendencies and habits of those whose freedom has been taken from them and to create in them a desire to lead better lives. With this end in view, prisons should be constructed in such a way as to maintain discipline and insure sanitation.

EDUCATIONAL INSTITUTIONS

In a brief summary, we would most respectfully call your attention to the educational institutions of our State. In the case of these institutions, where building and teaching expansion had not kept abreast with the natural growth of the student body, some of our students were forced, against their will, no doubt, to seek admittance to institutions without the confines of our own State. It is manifestly unfair and unjust, considering that all contribute to the support of her institutions, for the State to say to some of her young people, we will admit only a few of you into our schools, while the rest of you must go to the institutions of other states for instruction. We submit the proposition, gentlemen, that our great State is not willing to admit nor to assume that she cannot educate her children. It is the consensus of opinion that for

the good of South Dakota her young people should receive the larger portion of their primary schooling under the influence of the Sunshine State. Upon comparison with the attendance of two years ago, the Board found that the average attendance at the educational institutions for the current year was approximately 26% greater than the attendance at said institutions two years ago. During said time there was practically nothing done in the way of erecting new buildings.

BUILDING ESTIMATES

These estimates call for an expenditure for general repairs and new buildings for the biennium of \$1,672,165.00. We submit that it is not economy to neglect the matter of repairing buildings. Piecemeal repair of heating plants has proven quite expensive and added materially to the above estimates. The voters in several widely separated subdivisions of the State have recently approved of building programs in their respective localities for educational and public purposes far in excess of the plan recommended by this Board. In one school district alone the amount voted for new school buildings approximates the total recommended by this Board for educational institution buildings. The Board has the right to assume from the above figures that the voters of the State will approve the judicious expenditure of the amounts recommended to be appropriated for the biennium for buildings.

RURAL SCHOOLS

Too great emphasis cannot be laid upon the wisdom of the enactment, by the 1919 Legislature, of a law appropriating money for the encouragement of education in the rural and consolidated school districts of our State. Certain it is that the opportunity for mental development should be extended in ever increasing methods to the children of our rural districts. To them should be afforded as great a chance for enfoldment and advancement as to the children within the cities. The plan inaugurated by the above mentioned Legislature and enlarged and strengthened by the 1921 Legislature has received most hearty endorsement. Briefly the plan as outlined calls for certain standard requirements before State Aid is extended. To receive this aid the school shall be in session at least nine months; shall have a suitable modern school building, properly lighted, heated and ventilated, and meet the requirements as to specifications and sanitation prescribed by the Superintendent of Public Instruction; shall provide at least one acre of land for playgrounds and experiment plats; shall have a suitable library and such other apparatus and equipment as shall be prescribed by the Superintendent of Public Instruction; shall be in charge of a teacher of successful experience holding a first grade or higher certificate; and shall maintain a regular course of study for elementary schools as prescribed by the State course of study, which shall include instruction in elementary agriculture and home economics. The administration of this law under the Superintendent of Public Instruction has been most successful, with the result that there are now on file a greater number of applications for State Aid than ever before. To meet the demand for new schools that will come under the law during the biennium and care for those already designated State Aid schools, the budget calls for an appropriation of \$425,000.00, being an increase over the preceding appropriation of \$145,000.00. This money goes directly back to the taxpayers and has proven a wonderful stimulus to education. The safety of the republic depends upon the public schools.

AGRICULTURE

In all requests affecting agriculture the Board was governed by the idea that this great industry should be aided,

protected and advanced in order to save our people. Especially urgent appeared the necessity for definite figures and facts relating to the cost of production, and the amounts requested for this all important work were granted. The need of the farmers is not for a greater opportunity to go into debt, but for a chance to pay up. Not for an opportunity to produce more grain and livestock, but to be able to produce and market his products at a profit. We believe that the best efforts and thought of our people should be directed towards that one end. Accomplish that and our State's advancement cannot be checked.

WOMAN'S BOARD INVESTIGATION

Upon the request of the Budget Board, the above named Board submitted an exhaustive report of its work so far carried on and suggested possibilities of more effective and definite work by consolidation of certain activities. For your guidance and further information the Budget Board submits in full their report and approves the recommendations of the Woman's Board of Investigation. The report is fully set out on the last page of this report.

BUDGET CONTROL

The Board recommends that certain changes be made in the conduct of the State's business, having in mind greater uniformity and more accurate and definite information each month as to the receipts and disbursements. To this end it is recommended that the State Auditor be granted authority to add to his official staff a permanent budget clerk. It being held that the State Auditor represents the Legislature to the extent of seeing that the monies appropriated by your Honorable Body are expended in accordance with the appropriation authorized by your enactment, and preventing expenditures in excess of the appropriations. Experience shows that deficiencies are brought about by expending more of the appropriations early in the year than should be spent and keep within the authority of the Legislature. The auditor's department with a budget clerk added should be given authority to apportion the amounts appropriated monthly or quarterly and to hold all departments and institutions to those amounts, except in cases of emergency. It is recommended that salaries and maintenance, as far as possible be kept separate so that maintenance funds may not be used to increase salaries authorized. The Board recommends that no salaries be paid in excess of

the amounts approved by the Legislature. A system of monthly statements covering in detail all receipts and disbursements would be of material value to the State, and greatly assist the Budget Board in obtaining accurate information. The Board also recommends that the law establishing the Budget Board be amended to add to the membership of the Board the State Auditor-elect. The Board further urges that the law be amended to permit the payment for the Budget report from the funds appropriated for public printing, the same as other departments.

STATE PARK BOARD

The State Park Board requests for the appropriation of \$256,200.00 for the biennium are recommended by this Board. The greater part of their request being for land purchases. At the present time there are conflict of interests in the State Park. Individual owners of real estate within the park complain of the destruction of their crops by the game kept in the reserve, and the Park Board desires to purchase the lands to do away with the continual friction caused by the present arrangement. The Park Board would also purchase all school lands within the park. Such transfer would add to the total of the permanent school fund of the State. The sale of matured timber will take care of the appropriation. The question as to whether the game kept within the park should come under the control of the Park Board is for the Legislature to decide.

FEE DEPARTMENT

It is recommended that all offices, commissions, boards and departments that are maintained by fees, be placed under Legislative control, and all fees received placed in the State treasury to the credit of the general fund of the State, and appropriations made by the Legislature for maintaining such offices, commissions, boards and departments.

Respectfully submitted,

W. H. McMASTER, Chairman.
E. W. ERICSON, Chairman Pro Tem.
HUGH SMITH.
STENNING. E. A.
JONES.

To the Budget Board of the State of South Dakota, Legislative Session of 1923.

Gentlemen

In compliance with your request, we submit herewith for your consideration, a statement of the activities of the Women's Committee of Investigation since July, 1922, together with certain suggestions and recommendations which we think would, if adopted, make this Board a much more useful organization to the State and eliminate a great deal of duplication of effort and useless activity.

The Women's Committee of Investigation was created many years ago at the request of the W. C. T. U, and kindred organizations of women after evidences of abuse and mistreatment of inmates of certain of our State institutions had come to their attention. It was created in response to their demand that women be placed on the Board of Charities and Corrections, which demand was an unheard of thing at that time. The Board was without authority and could only report their findings to the Governor, and usually, if they found anything to criticize, they were relieved of their duties. It has been a heartbreaking task to the splendid women who have served in days past to know of existing ills in our penal and charitable institutions and find themselves powerless to remedy them except by the roundabout way of creating public sentiment. We are thankful that those days are past and that, for a long time now, the recommendations and suggestions of the Women's Committee of Investigation have been given a respectful hearing and recognition by all, and we especially want to express our appreciation of the courtesy, kindness and helpfulness of the present Board of Charities and Corrections and the Board of Regents.

SCHOOLS

A few years ago there seemed to be a need for closer supervision of schools maintaining dormitories, so the legislature added to the list of institutions to be visited, such schools and also hospitals. There are a great many private and parochial schools in this State and the visits of the committee are valuable. Most of the schools are doing splendid work and are a credit to the people maintaining them, but there are those with dormitories that are not what they should be. The Committee can only report and recommend in those cases. It would be better were there a standard dormitory which a school must meet. The school itself is another proposition; but housing, sanitation, food and supervision are proper subjects for consideration by this Committee and they should have some authority in the matter.

HOSPITALS

It is a question in the minds of this Committee just what is a hospital. There are many splendid hospitals in this State which are under constant supervision from various sources, which are a credit to the State and to the people maintaining them. These are public hospitals. It is a privilege and pleasure to visit these institutions, but aside from the valuable education afforded the Committee, we can see no benefit derived to any one. It would seem a useless activity on the part of the Committee and a waste of time and money from the State's standpoint. There are, however, a great number of so-called hospitals which are in private homes and well equipped doctor's offices. Then there are a number of private hospitals,

owned by individuals and operated by them, but open to practice to all physicians; and also private hospitals owned and operated by one physician. It would seem to this Committee that these institutions are better under the supervision of some other body, but we are certain that they do need supervision. We do not include, under this classification, maternity hospitals or homes.

Maternity hospitals, houses of refuge, orphans' homes, and all kindred institutions should remain under the inspection of this Committee. There should be some very definite provisions made regulating those institutions which are under this class

PAGE TWENTY-FIVE

but are commercial propositions, pure and simple baby farms. As we grow in population we shall have institutions of this class, in fact we have at least two such already, and they should have the closest scrutiny by proper authority to prevent abuses. The time to eradicate an evil is before it takes root. Some disinterested person or group of persons should have authority to inspect and report to proper authority all places of this character.

County poor farms, county jails and county hospitals should be added to the visiting list of this Committee. Many counties do not maintain poor farms, but in cases where we have been requested to visit such places we have done so and have found, in certain instances, deplorable conditions.

Jails are also in need of inspection. The State parole officer tries to do that, but he is unable to visit all of the jails and it should be some one's definite business to do this work. It is needed.

INSTITUTIONAL WELFARE

This Committee has found, in its visits to the various State institutions, penal, charitable and educational, that the respective boards, while doing splendid work supervising the administration of the institutions, do not have the time to make the close scrutiny that the Women's Committee can make. The Women's Committee takes sufficient time to thoroughly inspect the institution and has been able to make suggestions to governing boards which have resulted in benefit to both the institutions and the inmates. These visits are valuable and should be continued; but we suggest that there should be women on both the Board of Charities and Corrections and the Board of Regents for the reason that the work of both boards deals with the welfare of boys and girls and men and women, and no matter how well-meaning, a body of men cannot appreciate the needs of women and girls as well as can women. No one would listen to such a thing as a board composed wholly of women to look after men and boys. It would be considered preposterous. The same thing is true of women and girls. Since our schools are co-educational and inmates of our institutions consist of women and girls as well as men and boys, there should be both men and women on the boards governing them.

SUGGESTIONS AND RECOMMENDATIONS

Thus far we have dealt with things as they exist at the present time. There are, however, certain questions coining before this Legislature for consideration to which we respectfully invite your attention.

When this Committee was reorganized in July, with two new members, an endeavor was made to gain a comprehensive idea of the work required from the Committee and it seemed to resolve itself into three departments, viz, Child Welfare, Social Hygiene and Institutional Welfare.

CHILD WELFARE

The Legislature of 1919 created a Child Welfare Commission, (Chap. 134, S. L. 1919) to consist of the State Superintendent, the Superintendent of the State Board of Health, the State Parole Officer, the President of the Women's Committee of Investigation, and one other citizen, the idea presumably being in avoid creating a new commission and to provide for the expense being taken care of by appropriations of officers already in existence. There was an appropriation of \$500 for the purpose of perfecting the machinery whereby the commission would function.

The intention was good but the commission did not function.

At the Session of 1921, (Chapter 29, S. L. 1921) the Legislature made an appropriation of \$3,000.00 for the administration of the work which was to be in charge of the President of the Women's Committee of Investigation, the Superintendent of Public Instruction, Superintendent of the State Board of Health, etc. as before, and in addition provided for

county administration of the law under Chapter 142, S. L. 1921. This county board was to consist of the County Superintendent, Superintendent of Health, and the County Judge, and two persons appointed, one of which must be a woman.

Again the intent was good but the commission still does not function.

Child Welfare is not primarily an educational nor a health proposition. Certainly it is not a medical one except incidentally. The matter comes properly under the head of Social Service and should be administered by people doing that sort of work. Education and health are incidental, important it is true, but not fundamental.

Your Women's Investigating Committee, in its round of the state, has been met continually with requests to look into matters pertaining to the welfare of little children-matters that could not, in humanity or decency, be neglected. They, as a Committee, have had no authority, but have done the work, and always have been asked, "Where is the Child Welfare Committee?" "Why is it not at work?" They have answered that they did not know but they think they do know and that the reason is because the work was placed with right intent in the wrong hands. We should suggest, therefore, and recommend that the administration of the child welfare work be given to the Women's Committee of Investigation with adequate appropriation so that full time can be given by the one charged with the work, because no one, no matter how much their heart may be in the work, can afford to put in the time necessary to get results without remuneration, and further, because no man can do child welfare work so well as a woman-not because he does not care, but because in the nature of things he looks at life from a different view point.

If requested, this Committee will give concrete instances of the work done along this line which would take too much of your valuable time to enter into in this report.

To sum up, these are our suggestions and recommendations:

1. That there be a standard fixed for dormitory boarding schools so that an investigating committee will have something concrete by which to check.

2. That the definition of a hospital be made and this Board be not required to visit public hospitals except the request of the Governor.

3. That this Committee still be required to visit state institutions and that in addition to its report Governor, it be required to report to and advise with the Board of Charities and Corrections and the Board of Regents present Committee has done this but it is not required to.

4. That the state administration of the Child Welfare Commission be divorced from the State Educational Department and the State Board of Health and, be the Women's Committee of Investigation.

5. That only high school graduates be admitted to normal schools.

6. That if these added duties are given to the Women's Committee of Investigation, they be required to maintain accurate records available at all times to the scrutiny of persons and that their expenditures be audited in the manner as other state activities.

7. That definite appropriations be made for specific purposes.

8. We urge that action be taken by this Session Legislature to fulfil the promise of all political parties to complete the segregation of the boys and girls at the Plankinton Training School by removing the blind children to Falls from Gary, and the delinquent girls at Plankinton Gary, thus creating room at Plankinton for boys between ages of eighteen and twenty-one who are first offenders.

Respectfully Submitted,

WOMEN'S BOARD OF INVESTIGATION

By Mrs. F. D. Smith, Pre

Date, January 10, 1923.
